Examples

7h 15m = 7.25 hours 8h 06m = 8.10 hours 6.75 hours = 6h 45m

The decimal is a fraction of an hour: 7.25 does not mean 7 hours 25 minutes. Values above are rounded for display. Retain the underlying time and round the final total. This chart does not define an employer time-rounding policy.
